

AP020 Disk
(90mm)

Package Contents:

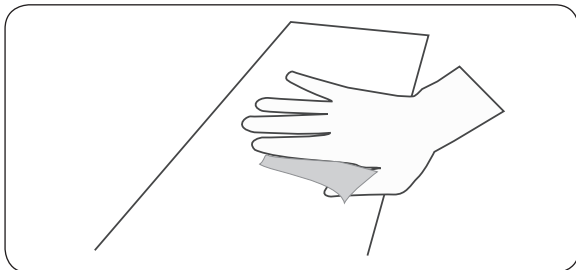

- (1) Self-adhesive dashboard pedestal mounting disk
- (1) Alcohol cleaning pad

***Note:** Adhesive disk is intended for semi-permanent installation and one-time application. If disk needs to be removed, please see the removal instructions below.

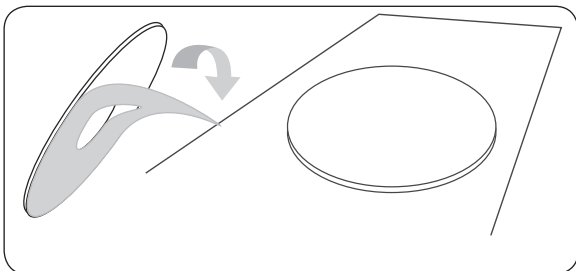

Dashboard Mounting Instructions

Step 1. Choose a suitable location for disk (and pedestal) installation. Do not place mount in or near an air bag deployment zone or where it will obstruct view of the road or hinder vehicle operation.

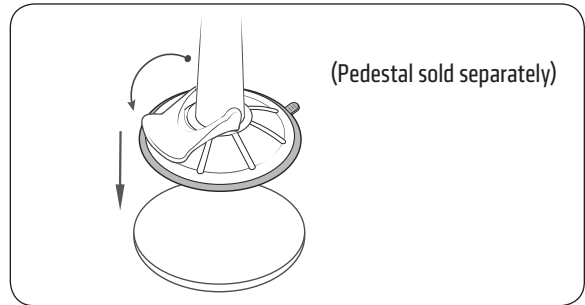

Step 2. Clean the dashboard surface area thoroughly with the included alcohol pad. Allow the area dry before applying the mounting disk.

Step 3. Remove the paper backing of the disk and place on the cleaned dry surface. Press the top of the disk down firmly to allow the adhesive to stick to the surface. Allow 24 hours for the adhesive to cure to the surface before applying any pressure.

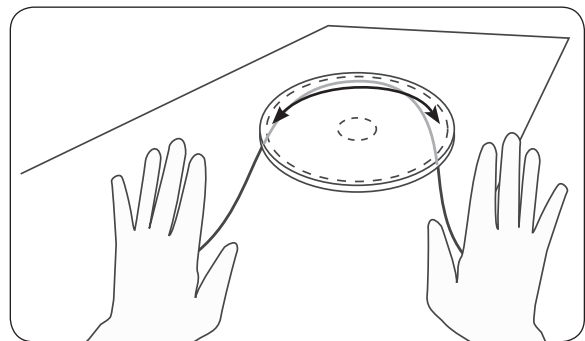

Step 4. Place the suction cup of the pedestal (sold separately) firmly down on the center of the mounting disk and lower the securing lever.

Disk Removal Instructions

Step 1. Prepare the surface around the disk by applying a generous amount of rubbing alcohol or similar adhesive removal product to the area with a cotton swab. Let the liquid saturate the adhesive area for about a minute.

Step 2. Take a long piece of dental floss in each hand and slowly work back and forth at the base of the adhesive disk. Gently use the dental floss to cut the adhesive from the dashboard until the black plastic disk is removed.

Step 3. If the sticky adhesive area breaks apart or does not come off completely, re-apply a small amount of alcohol (or adhesive removal liquid) and carefully lift off the remaining area by hand.

Safety Precautions

Follow all manufacturer safety guidelines for operating your device. Failure to practice safe usage of your device while driving may result in damage, injury, or death. Do not install Arkon products over an air bag cover or within the air bag deployment zone.
