INSTRUCTIONS

A. Standard Adhesive installation

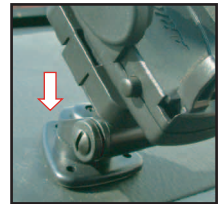

1. Connect the SIDE GRIP cradle to the multi-angle pedestal by inserting the male notch on the cover plate into the back side of the female slot of the cradle into the locked position.

2. Choose a suitable place in the vehicle to install the solution so that it will not interfere with normal operation of vehicle.

3. Before using the mounting adhesive provided, first use the alcohol cleaning pad to clean mounting location on dashboard of residual oils.

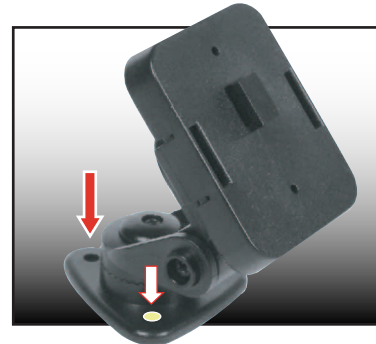

4. After adhesive has bonded at room temperature (approx. 72°F) - **allow 24hrs prior to use for best results.**

B. Optional Screw Mount Installation

1. Use the holes on the bottom of the pedestal base as a template to mark the location of the screws. Then drill three holes as needed.

2. Connect the SIDE GRIP cradle to the multi-angle pedestal by inserting the male notch on the cover plate into the back side of the female slot of the cradle into the locked position.

NOTE

When adjusting the angle of the Holder / Mount, always grasp the pedestal base with one hand and the holder with the other hand and apply pressure slowly.

Safety Precautions

1. Do not mount this product near or over an airbag cover panel / deployment zone.
2. Do not use while driving. Arkon Resources, Inc. does not promote use of a hand-held device except when the vehicle or craft is safely parked or stopped.
3. Arkon is not responsible for the permanent damage to the vehicle for installation of mount.
